Abros Billing System – An Introduction

“Abros Billing System” is a GST ready Billing Software. It is basically developed for Billing purpose, to be an alternative to the people who has low budget to manage its entire invoice system. It is very simple to operate and learn. This software is used to manage stock of ready material, stock of raw material, purchase, issue, and finally invoicing. It keeps record of sales, services, inventories, purchases so that, at the time of filing return (monthly & yearly) it will help you to put correct data.

You can use it to store the existing items list and its details such as name, HSN code, rate, etc., Customer details, ready material stock, raw material stock, purchase, issue, and finally for creating Invoice. As it has facility to store all customer CRM and stock items, at the time of billing you have simply to select the customer and item from the list.

The highlights of this software:

- User friendly interface, very simple, easy to learn and operate.
- No need to bought latest computer or laptop, it will operate on windows XP, windows 7 and windows 8.
- In this software HSN code is pre-loaded.
- Automatically select the appropriate GST (i.e., SGST, CGST, or IGST) depending upon the destination address.
- You can use it to manage customer CRM, ready item stock, raw material stock and purchase on real time basis.
- Invoice format can be customised as per customers existing format.
- Cost of software is much less in comparison with existing accounting software.

At present its cost is Rs. 10,000/- only. Discount is available on limited number of copies, so book it now.

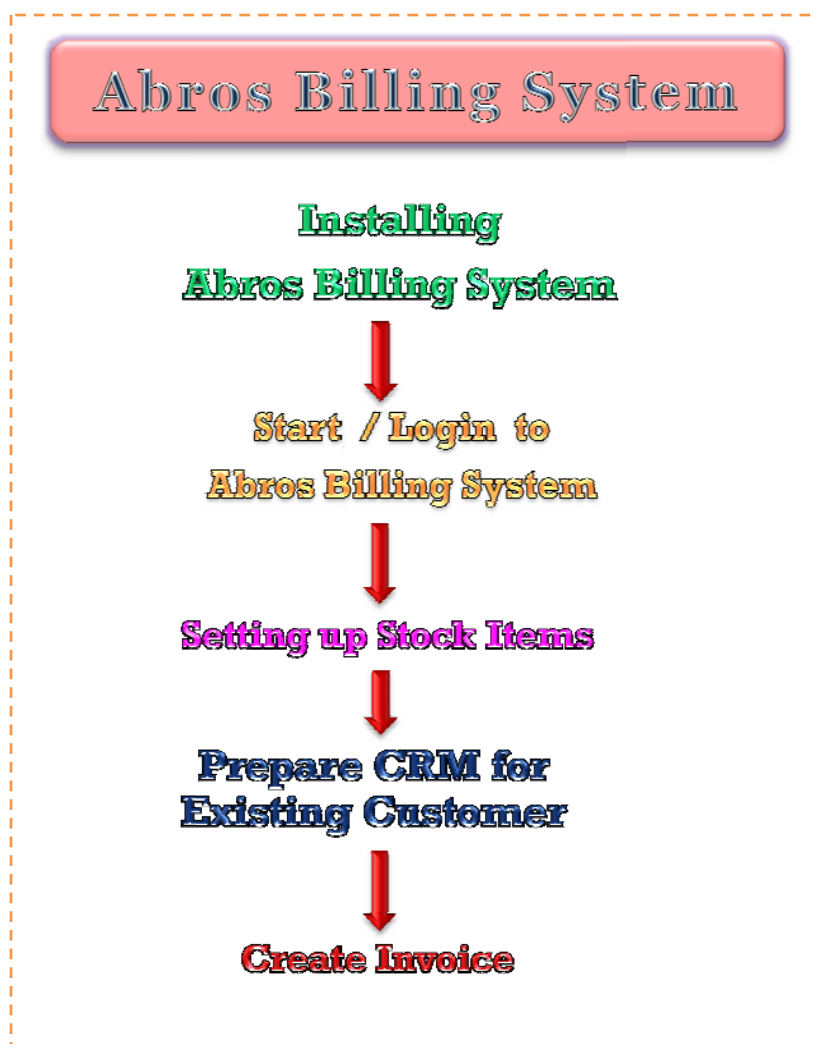

For demo you can call us at 9891451233 or visit www.abroandsis.com/gst.html to download for free.
